### Flexible indoor units connection

Mini VRF with intelligent control gives you independent zoning control with maximum flexibility. A single outdoor unit supports up to nine indoor units, freeing up considerable space outside. Use your backyard more wisely with much more space available created by less number of outdoor units.

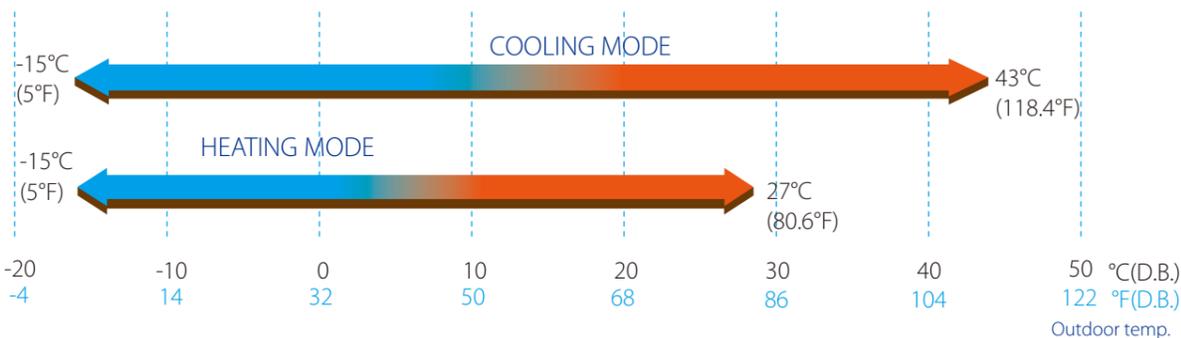

- Max. 7 indoor units for a 16kW(52,900Btu/h) outdoor unit installation
- Max. 6 indoor units for a 14kW(47,800Btu/h) outdoor unit installation
- Max. 6 indoor units for a 12kW(40,900Btu/h) outdoor unit installation
- Max. 5 indoor units for a 10.5kW(35,800Btu/h) outdoor unit installation

\*For 20-45KW unit, please check the information in the specifications.

### Wide operation temperature range

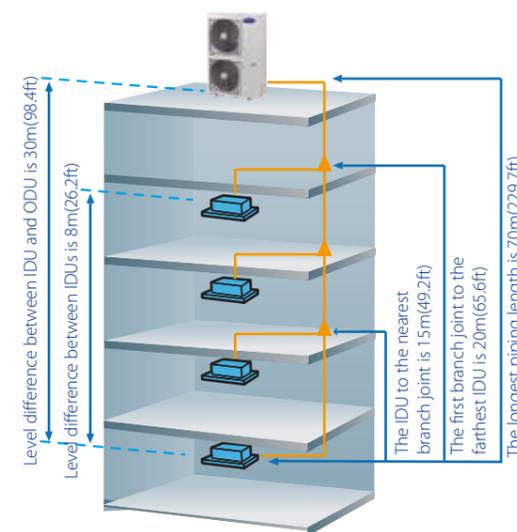

Mini VRF system operates stably at extreme temperature range from minus 15°C (5°F) to 43°C(118.4°F).

\*For 20-45KW unit, please check the information in the following specifications.

## Flexible piping design

The Mini VRF provides a total piping length possibility of 250m(820.2ft), a maximum height difference between outdoor and indoor units of 30m(98.4ft). The height difference between indoors unit can be up to 8m(26.2ft). These generous allowances facilitate an extensive array of system designs.

1 Total pipe length is equal to all the liquid pipe or all the gas pipe length.  
 2 When the total equivalent pipe length of liquid side plus gas side is more than 90m(295.2ft), it needs to meet the specific conditions according to the installation part of the technical manual.  
 3 \*For 20-45KW unit, please check the information in the specifications.

## High Efficiency

### High COP and EER values

\*For 20-45KW unit, please check the information in the specifications.

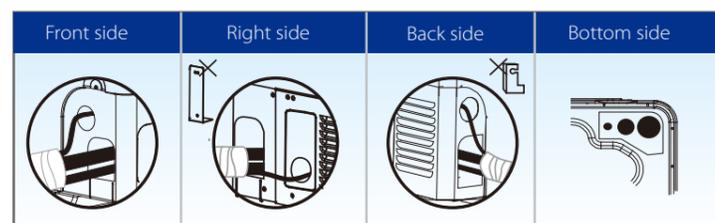

## High performance heat exchanger

- The new designed window fins enlarge the heat-exchanging area, decrease the air resistance, save more power and enhance heat exchange performance.
- Hydrophilic film fins and inner-threaded copper pipes optimize heat exchange efficiency.
- The specially coated blue fins enhance durability and protect against corrosion from air, water and other corrosive agents, assures a longer coil service life.

## More convenience in installation

A four-direction space is available for connecting pipes and wiring in various installation sites.

## More convenient piping connector - branch box

Easier and safer installation thanks to a branch box that simplifies piping work and the adoption of screw connection.

Both left and right pipe flare connection from outdoor unit to branch box is reserved, which greatly simplifies field installation.

Two sets of pipe size converter are packed with branch box to transfer the pipe size from  $\Phi 6.35\text{mm}(\Phi 1/4\text{in})$  to  $\Phi 9.53\text{mm}(\Phi 3/8\text{in})$  and from  $\Phi 12.7\text{mm}(\Phi 1/2\text{in})$  to  $\Phi 15.9\text{mm}(\Phi 5/8\text{in})$ .

### Low noise

The branch pipe is linear expansion design regulates the flow of refrigerant and reduces the noise. By locating the branch box in the ceiling or outside, noise generated by the branch box can be kept clear of living spaces, thus makes noise level to a minimum.

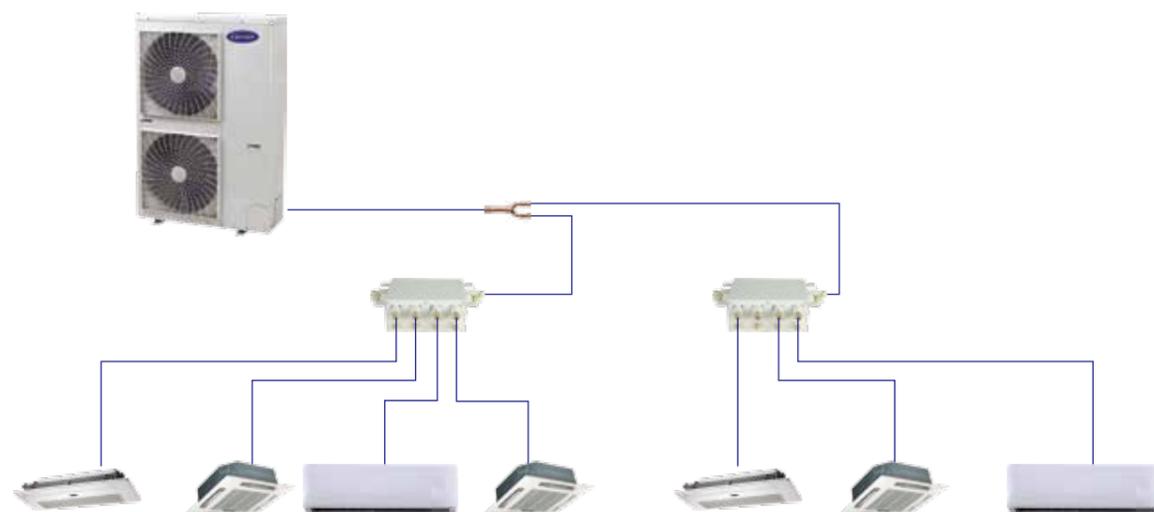

### Brazing-free quick installation

All the piping leading to and from the branch box is connected using screw joints, which can be installed quickly and easily.

### Indoor installation

The branch box can be installed in the ceiling rather than outside. Removing the side and bottom covers provides easy access for maintaining inner components such as circuit boards.

## New piping connection design

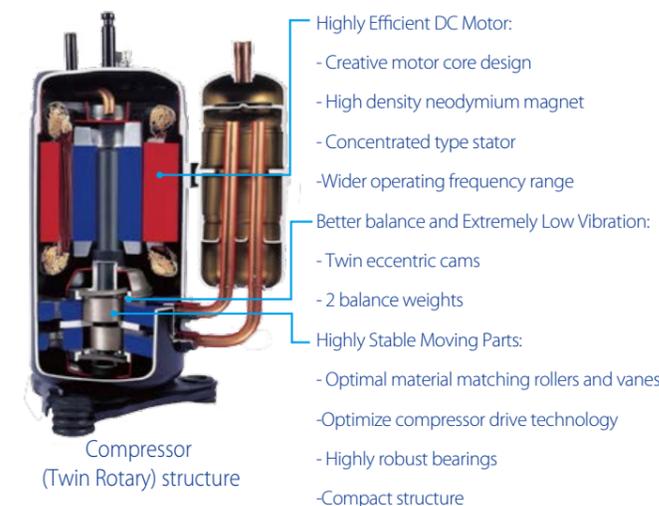

\*40/45KW unit can not connect branch box

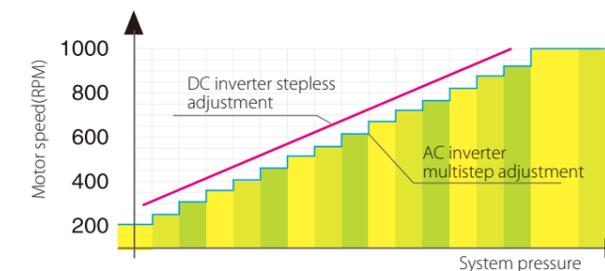

## Advanced Technologies

### Full DC inverter technology

At the heart of our system is a highly intelligent inverter driven compressor. This advanced technology enables the output of the outdoor unit to be modulated by the cooling or heating demands of the zone that it controls. This advanced system ensures precise temperature regulation and highly efficient energy usage, making a significant contribution to the limiting the impact on the environment.

High efficiency DC fan motor saved power up to 50%.

### Noise reducing design

Optimally designed fan shape and air discharge grille increases air volume and reduces running noise.
