### Features and benefits

#### Full DC Inverter

Full DC inverter system (compressor, indoor fan motor and outdoor fan motor) provides more comfortable indoor environment, higher performance in partial load and better heating performance in low ambient temperature.

#### R-32

Environmentally-friendly refrigerant cools and heats more efficiently without destroying the ozone layer.

#### Turbo Mode

Provides quicker cooling with one press of the remote button.

#### 3D Air Flow

Delivers the airflow horizontally and vertically like nature wind.

#### Multi-Speed Fan

Multi-speed fan helps satisfy various airflow requirements.

#### Self Diagnosis

Clearly displayed failure codes allow for quicker troubleshooting and easier maintenance.

#### Auto Restart

Unit is automatically returned to previous operating conditions after a power outage, for simplified operation.

#### 3-Minute Protection

A 3-minute delay before the compressor will restart helps avoid compressor damage and work time.

#### Inner Groove Copper Tube

Inner groove copper tubing allows more refrigerant to pass through, improving heat exchange by 30 to 50% when compared to traditional copper tubing, and lowering power consumption while keeping output capacity at the same level.
